

About every 3 hours, a person
or vehicle is hit by a train.

On foot or in a vehicle, the result is the same —
severe injury or even death.

When you See Tracks, Always Think Train!

It takes the average freight train a mile or more to stop.

The view near the tracks makes it impossible to judge the speed of an approaching train.

Trespassing on rail and transit tracks or violating rail crossing is illegal and dangerous.

**** There were 275 tragic rail incidents recorded statewide in 2014**

**** Of these, 97 resulted in injury**

**** 128 ended in death**

**** California leads the nation in annual rail fatalities**

Operation Lifesaver, Inc., a national non-profit educational organization,
seeks to reduce collisions, injuries and fatalities at
America's highway/rail/grade crossings and on railroad rights-of-way.

HELP US SAVE LIVES WITH THE SEE TRACKS? THINK TRAIN! RAIL SAFETY EDUCATION
